

Rituraj Singh

AI Engineer

Bhopal, MP • +91 99393 69546 • rituraj69546@gmail.com • linkedin.com/in/rituraj-singh-b19119290 • github.com/Rituraj6047

EDUCATION

B.Tech, Computer Science & Engineering (AI & ML) – VIT Bhopal University CGPA 8.39 / 10 • No active backlogs	2023 – 2027
Class XII (CBSE) 86.4% • Class X (CBSE) 94.6% – DAV Public School, Bistupur	2021 – 2023

TECHNICAL SKILLS

Languages	Python, TypeScript, SQL, C++
AI & ML	LLM integration (Llama 3.3, Gemini, Ollama), computer vision (OpenCV), OCR
AI-Assisted Dev	Claude Code
Full-Stack	Django REST Framework, FastAPI, React, Next.js, Tailwind CSS
Databases	PostgreSQL, MySQL
DevOps & Testing	Docker, GitHub Actions, Caddy, Linux, pytest, Playwright
CS Fundamentals	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Software Developer Intern – ConsultiFI Data (Remote) <i>Collaborated with a team to build a multi-tenant SaaS platform for manufacturers, from idea to client onboarding.</i> Stack: Next.js, TypeScript, PostgreSQL, Django REST Framework, MySQL, React, Docker, Caddy, GitHub Actions, Playwright	Jun 2026 – Present
• Architecture: Next.js and PostgreSQL platform, linked by single sign-on to a Django and MySQL workspace. • Scale: Designed for 200 organisations with 50 concurrent users each; every tenant’s data is isolated. • Client onboarding: Moved the first client’s existing system onto the platform without a rewrite. • Delivery: CI runs end-to-end tests; scripted Docker deploys back up the databases and run health checks. • IoT data: Unit-tested Python pipelines that flag anomalies in flow-meter telemetry.	
AI Intern – Tata Steel Utilities & Infrastructure Services Ltd, Jamshedpur Stack: Python, OpenCV	May – Jun 2025
• Built and deployed a real-time computer-vision service on 4 live CCTV feeds at an operating industrial plant, owning frame extraction, data preparation, detection tuning, evaluation and automated alerting. • Reached 92% accuracy on 1,000+ vehicle detections a day in production and cut manual monitoring effort by ~60%. Presented the results to plant stakeholders and wrote the handover docs.	

PROJECTS

Praxya – AI Compliance MVP for GHG Reporting github.com/Rituraj6047/Praxya Stack: Next.js, TypeScript, FastAPI, PostgreSQL (Supabase), Groq (Llama 3.3 70B), Pydantic, Docker, pytest	Mar 2026 – Present
• Multi-tenant platform that turns plant bills and invoices into audit-ready Scope 1 & 2 emission reports for SEBI BRSR. • A worker driven by Postgres notifications (pg_notify) runs OCR and LLM extraction and retries failed jobs up to 3 times. • Each figure passes Pydantic validation and human review, and insert-only lineage tables trace it to its source.	
Conversion Funnel Analyzer – AI Landing-Page Auditor github.com/Rituraj6047/conversion-funnel-analyzer Stack: Next.js, TypeScript, Gemini API, Zod, Cheerio, DOMPurify, Server-Sent Events	May 2026
• Takes a landing-page URL and runs three Gemini stages: map the funnel, find friction points, score fixes. • The model only sees parsed page structure; each stage is Zod-validated and hallucinated IDs are dropped. • The scraper blocks SSRF with DNS checks and a private-IP blocklist and sanitises HTML; the API is rate-limited per IP.	
FileMyCa – GST Data-Collection Portal for CA Firms github.com/Rituraj6047/FilemyCA Stack: Next.js, TypeScript, Supabase (PostgreSQL), Vercel	Feb – Mar 2026
• Built and deployed solo in 5 days: a filing dashboard and client upload portal with per-firm row-level security.
