

# Rituraj Singh

AI Engineer

Mail · +91 99393 69546 · LinkedIn · GitHub

## Summary

---

Curious and self-driven engineer who enjoys taking products from idea to deployment independently. Comfortable with ambiguity, quick to learn new tools, and disciplined about clean, reliable systems. Thrives on building end-to-end and shipping fast without cutting corners on correctness.

## Technical Skills

---

- **Languages:** Python, TypeScript, JavaScript, Java, C++
- **LLM / AI:** Claude API (tool\_use), Gemini, Groq, LangChain, Pydantic, Agentic Pipelines, RAG
- **ML / CV:** PyTorch, TensorFlow, Scikit-learn, OpenCV, Pandas
- **Full-Stack:** Next.js, React, FastAPI, Supabase, SQL
- **Infra / DevOps:** Docker, AWS, Vercel

## Work Experience

---

**AI Intern — Tata Steel Utilities & Infrastructure Services Ltd, Jamshedpur** *May – Jun 2025*

- Built an OpenCV + Python computer vision system to detect speeding vehicles across 4 live CCTV feeds with automated alerts.
- Deployed at an active industrial facility: 1,000+ detections/day at 92% accuracy, reducing manual safety monitoring by ~60%.

## Projects

---

**Praxya — AI-Powered GHG Compliance Platform · GitHub** *Mar 2026 – Present*

- Used Claude API (tool\_use) + Pydantic to extract structured data from OCR'd PDFs (pdfplumber, pytesseract) for automated GHG reporting.
- Built a Scope 1 & 2 emissions calculator on IPCC 2006 factors and a multi-tenant Supabase backend with audit-safe schema; FastAPI + Next.js frontend generating BRSR-compliant PDF reports.

**FileMyCa — GST Data Collection SaaS · GitHub** *Feb – Mar 2026*

- Solo-built a B2B portal with Next.js, TypeScript, and Supabase replacing WhatsApp-based GST data collection for CA firms — shipped in 5 days.
- Used SheetJS for Excel validation on client uploads and built an admin dashboard tracking 47 MSME clients with a bulk reminder system.

**Conversion Funnel Analyzer — LLM CRO Pipeline · GitHub** *May 2026*

- Built a 3-stage Gemini pipeline (map → analyze → recommend) with Zod-validated structured outputs to audit website conversion funnels.
- Used Cheerio for deterministic DOM extraction before any LLM call, SSRF-hardened fetching, and SSE streaming to a Next.js UI.

## Education

---

**B.Tech — Computer Science & Engineering (AI & ML), VIT Bhopal University** *Expected May 2027*

CGPA: 8.39 / 10.0 · Coursework: Machine Learning, Deep Learning, Computer Vision, NLP, Cloud Computing
